Starware GmbH

Job-Titel: Junior IT Logistics Consultant WMS (m/w/d)

Job-Beschreibung
At Starware, we love logistics and we are all about improving the processes in our customers' supply chains. Starware is an official implementation and reselling partner of Blue Yonder Warehouse Management. We advise well-known 3PLs, dealers and producers in all details of this Warehouse Management System (WMS).

For our team in Hamburg we are currently looking for a Junior IT Logistics Consultant WMS (m/w/d). The start date is flexible.

As a Junior IT Logistics Consultant WMS (m/w/d) at Starware, you are the "Jack of all Trades"! You will mostly learn on the job and participate in different tasks related to implementing Blue Yonder Warehouse Management such as consulting, development and support.

What you will be doing:
- Analysing processes and translating them into solutions within Blue Yonder Warehouse Management
- Designing processes and making changes based on customer requirements
- Developing solutions by using (and combining) the standard functionality of the WMS
- Creating reports, interfaces, and labels
- Identifying and solving problems by using tracing and troubleshooting tools
- Creating test scenarios for changes or configurations
- Providing continuous support for our clients’ systems

What we offer:
- Attractive compensation package with a profit-sharing plan and 31 leave days
- Mobile office with flexible working hours
- A MacBook Pro and a new iPhone
- Legendary company events and a great team
- An agile work environment with low hierarchies

Anforderungsprofil

What do you need:
- Degree with focus on logistics or Supply Chain Management
- First experience with consulting, development and/or support
- Interest to learn about the functional and technical side of a WMS
- Demonstrable affinity with IT topics like SQL, coding languages etc.
- A communicative and solution-oriented work-style
- Strong analytical skills
- Being a team player and also able to work independently
- Full working proficiency in English

What would be great:
- Knowledge of Blue Yonder WMS or previous experience with other Warehouse Management Systems, e.g. SAP EWM or Manhattan
- Capacity to read and write JAVA, Jasper Reports, SQL
- Full working proficiency in German or Dutch
